

INDIVIDUAL PDU SOLUTIONS FOR SHIPPING ELECTRIC & HYBRID MARINE EXPO EUROPE 2023

in-Tec Bensheim, specialist for high-voltage cabling and high-voltage components, will be represented at the Electric & Hybrid Marine Expo Europe from 20 to 22 June 2023 in Amsterdam. This year, the company will be highlighting its services relating to customised PDUs (Power Distribution Units) in Hall 8 at stand number 1220.

in-Tec Bensheim is a leading provider of solutions for the optimal distribution of high voltage in the high-voltage cable system to all relevant components and electrical consumers. The company has already had experience in developing and manufacturing its own PDUs since 2012. Many PDUs available on the market have specifications that do not always meet the project-specific requirements of aviation and shipping. This is where customised PDUs prove to be the perfect solution. in-Tec Bensheim works closely with clients to develop HV PDUs that are tailored to application-specific purposes for various vehicles in water, land and air use.

The close integration with the portfolio of the subsidiary "in-Tec Project & Competence Center GmbH" makes it possible to develop current solutions for demanding projects in the marine sector and, if required, also to bring them to series production readiness.

"We are very much looking forward to presenting at Electric & Hybrid Marine Expo Europe 2023," emphasises Stefan Krug, Managing Director of in-Tec Bensheim. "The fair is a great opportunity to share our know-how and make new contacts."

Joint presentation with AGRO AG

in-Tec Bensheim presents itself at booth 1220 in hall 8 together with the co-exhibitor, AGRO AG. The specialist for cable glands will be presenting AGRO EVolution EMC, an EMC cable gland that is equipped with a new type of pluggable shield contact solution, guarantees a high shield current carrying capacity and, thanks to its design, is able to withstand the influences of high switching frequencies caused by DC/DC converters and AC converters.

Arrange a trade fair date

Admission to the fair is free of charge for qualified industry professionals. We will be happy to inform interested parties about our services in the run-up to the fair.

If you would like to come to the fair in person, we can already arrange an appointment on site. Simply send us an e-mail at info@in-tec.de or call us on +49 6251 70588-0.

PRESS RELEASE

About in-Tec Bensheim:

Since 1996, in-Tec Bensheim has been a partner for component assembly, cable assembly and the manufacture of high-quality components for companies in the medical technology, electrical engineering, mechanical engineering and automotive industries. In addition, true to the motto "We connect the e-Powertrain", in-Tec Bensheim manufactures individual high-voltage wiring systems according to VDA standards for the e-mobility industry.

In long-term cooperations, in-Tec Bensheim supports market-leading manufacturers from the mechanical and electromechanical industry with its know-how. In addition to a full-service offering as a system supplier, OEM manufacturer and contract manufacturer, in-Tec Bensheim also handles the purchasing and logistics of components and parts as well as stockpiling. For further information please visit www.in-tec.de/en and www.hochvoltkabel.de/en.
